Fund overview

Redhedge focuses on managing liquid alternative Relative Value Credit Market-Neutral strategies. Our strategy is founded on the fact that short-term price volatility can temporarily lead to the relative mispricing in credit markets leading to relative value trading opportunities. Our core investment philosophy is to maintain consistency and discipline regardless of market direction, volatility or conditions. By maintaining this disciplined approach, we can minimize the volatility and potential negative drawdowns. The investment process consists of idea generation and relative value credit selection. Portfolio construction is driven by the team's quantitative approach combined with fundamental credit analysis. This repeatable and disciplined process is focused on identifying the most attractive relative value credit opportunities across the European credit universe.
